

**[Level01] \*\*\*Driller Night!\*\*\***

Objective: The transporter aboard the LMS Explorer has been slightly damaged by the low power and is not working properly. A team of Rock Raiders has been teleported in to the wrong cavern and will have to find their way back to the Tool Store. Drill through the cavern walls to find the Tool Store once you have found it, start our mining operation by collecting five Energy Crystals.

**LEADS TO LEVEL 2 OR 3**

- **[Level02] \*\*\*It's A Hold Up\*\*\***

Objective: A new cavern has been found, and we must begin to build Rock Raider HQ! Unfortunately recent earthquakes in this area have made the cavern walls very dangerous. Secure the area by reinforcing the cavern walls to prevent cave-ins once this is done continue with the mining operation and collect five more Energy Crystals.

- **[Level03] \*\*\*Rubble Trouble!\*\*\***

Objective: A new cavern has been found but the area is very unstable! The cavern floor is covered with fallen rocks and boulders. We must establish Rock Raider HQ and begin our mining operation but first we must reinforce the walls and clear the debris from the floor, once the cavern is secure continue our mining operation by collecting five Energy Crystals.

**LEADS TO LEVEL 4, 5 OR 6**

- **[Level04] \*\*\* A Breath Of Fresh Air \*\*\***

Objective: Ok Rock Raider - this is a tough mission. The air in the excavated caverns is being quickly used up. We must urgently construct a Support Station to supply more air. Start by building a mobile Teleport Pad and use it to transport down some more Rock Raiders to assist you in building the Support Station. WARNING: The more Rock Raiders you transport down to help, the faster your air supply will run out!

- **[Level05] \*\*\* The Path To Power \*\*\***

Objective: Ok Rock Raider - we must begin the construction of Rock Raider HQ. The first thing we need is our Power Station. Build a section of of the Power Path next to the Tool Store and when you have collected enough Energy Crystals and Ore build the Power Station next to it. Be very careful Rock Raider, the walls of the cavern are unstable and may need reinforcing!

- **[Level06] \*\*\* Explosive Action \*\*\***

Objective: Ok Rock Raider - another Teleporter malfunction has left one of our vehicles stranded in a nearby cavern. You must

recover the lost vehicle, but to reach it you will have to blast your way through some very hard rock. Train a Rock Raider in using dynamite by sending him to the Support Station. Once he has been trained, use the dynamite to blast your way through the hard rock to find the missing vehicle. When the vehicle has been found train a Rock Raider as a driver and return the vehicle to Rock Raider HQ.

### LEADS TO LEVEL 7 OR 8

- **[Level07] \*\*\* Search 'n' Rescue \*\*\***

Objective: Are you ready for some more action? One of our Rock Raiders has become lost while exploring distant caverns at the end of an underground river. Establish the Rock Raider HQ and build a Dock next to the river. Once you have achieved this, transport down a Rapid Rider. Send a Rock Raider to the dock to train as a sailor. Take the Rapid Rider and explore the river until you find our missing Rock Raider!

- **[Level08] \*\*\* Breathless \*\*\***

Objective: Are you ready for some more action? An earthquake has caused several cave-ins. Our scanners detect that three of our Rock Raiders have been trapped in caves. Quickly build up our Rock Raider HQ and prepare a search party to find and rescue the trapped men. Some of your Rock Raiders should be trained in using dynamite and others should be trained as Geologists so we will need to build a Geological Centre. You must work quickly to find the lost Rock Raiders before their air runs out and they are forced to teleport. Remember we are still very low on Energy Crystals and the Teleport Station aboard the LMS Explorer is not working properly. We can't be sure where they'll end up!

### LEADS TO LEVEL 9 BOSS #1

- **[Level09] \*\*\* Frozen Frenzy \*\*\***

Objective: The scanners aboard the LMS Explorer have been monitoring the movement of large unidentified life forms that appear to be made from ice! We cannot endanger our mining activities and must defend Rock Raider HQ against any possible threat. Protect Rock Raiders HQ by using the electric fences and repair any damage by training some Rock Raiders as construction engineers. You will need to fend off any attacks and continue to collect Energy Crystals until we have enough to build the Chrome Crusher. The Tunnel Transport is waiting in a near by cave to air lift us to a safer cavern, but our only way of reaching it is by drilling through hard rock with the Chrome Crusher or using dynamite to blast our way through. Take care Rock Raider!

## LEADS TO LEVEL 10 OR 11

- **[Level10] \*\*\* Erode Works \*\*\***

Objective: We had just begun mining activities in a deeper cavern when disaster struck! Molten lava and magma is slowly eroding the perimeter of Rock Raider HQ. We have located another cavern nearby that is safe but the Ships transport teleporter is being repaired and cannot be used. We must get to the safe cavern by foot! Try to prevent the magma from advancing by building a perimeter path around the Rock Raider HQ. There is hard rock between us and the safe cavern and we must use dynamite to blast through. Build up our HQ until we can train a Rock Raider to use dynamite and then escort the rest of the Rock Raiders to the safe cavern. Once you have made it safely there, resume mining and collect 15 Energy Crystals.

- **[Level11] \*\*\* Water Lot Of Fun \*\*\***

Objective: I hope you don't mind water Rock Raider! An underground river has burst its banks and devastated Rock Raider HQ! All that is left is the dock. There are still valuable Energy Crystals to be recovered and we must continue our mining operation. Build a new base on the opposite bank of the river and ferry equipment to the other side and re-establish Rock Raider HQ! Once the base is operational collect 15 Energy Crystals.

## LEADS TO LEVEL 12, 13 OR 14

- **[Level12] \*\*\* Water Works \*\*\***

Objective: OK Rock Raider - are you ready for the next mission? A flood has left many of our Rock Raiders stranded on islands in an underground lake! You must establish our Rock Raider HQ and build a dock. Once you have achieved this, build a Cargo Carrier and rescue the stranded Rock Raiders and collect bring back any Energy Crystals that they have collected. We need a total of 20 Energy Crystals.

- **[Level13] \*\*\* Rock Hard \*\*\***

Objective: We have located a cave rich with Energy Crystal seams and Ore deposits. Unfortunately the cavern is too small for large drilling vehicles and hard rock is blocking our progress. Positioning our buildings will be critical as there is hardly any floor space! Once you have established the Rock Raider HQ, train a Rock Raider to use explosives and collect 20 Energy Crystals. WARNING: Proceed with caution, our scanners have detected Ice Monsters in the area!

- **[Level14] \*\*\* Don't Panic! \*\*\***

Objective: Some of our Rock Raiders have become trapped by recent cave-ins and molten magma is threatening to engulf them! We cannot risk teleporting them to safety from the cavern - another malfunction could place them in even greater danger! Guide them back to the safety of the Rock Raiders HQ. Once you have them safely back continue the mining operation and collect 20 Energy Crystals.

#### LEADS TO LEVEL 15 OR 16

- **[Level15] \*\*\* Ice Spy \*\*\***

Objective: Our mining operation has been going smoothly until now. We have detected a number of small caverns and we suspect they contain Ice monsters. We must avoid disturbing them or be faced with a catastrophe! There are other caves with an abundance of Energy Crystals and Ore find a way to get to the Energy Crystals without disturbing the Ice monsters and collect 25.

- **[Level16] \*\*\* Split Down The Middle \*\*\***

Objective: A team of our Rock Raiders has been split apart by a rock fall in a dangerous area of a distant cavern. The scanners show that the whole area is suffering tremors and is unstable. Help both teams to find their way back to the Rock Raiders HQ and ensure that the whole area is free from any more cave-ins! Once you have rescued both teams continue our mining operation and collect 25 Energy Crystals.

#### LEADS TO LEVEL 17 BOSS #2

- **[Level17] \*\*\* Lava Laughter \*\*\***

Objective: Ok Rock Raider - are you ready for the next mission? The geological scanners have located a cavern system that has an abundance of Energy Crystals and Ore. Your mission is simple, build a Rock Raider HQ and collect 30 Energy Crystals. The mission may sound like an easy task for someone with your capability, however, the scanners have been playing up again and I don't want you to take any chances... Good luck Rock Raider.

#### LEADS TO LEVEL 18 OR 19

- **[Level18] \*\*\* Oresome! \*\*\***

Objective: We are getting sketchy reports of an attack on Rock Raider HQ by Lava Monsters. Nobody was injured but it appears that the Monsters have totally destroyed the Power Paths that connected and supplied energy to the buildings. We must restore power to Rock Raider HQ and continue the mining operation and collect 35 Energy Crystals. There are also reports that a dam stemming the flow of a lava

river has been breached and is threatening to engulf the entire area. I suggest that you get some Loader Dozers on the scene immediately.

- **[Level19] \*\*\* Fire 'n' Water \*\*\***

Objective: Ok Rock Raider, are you ready for your next mission? We have established our Rock Raider HQ on the edge of a large, underground lake. Geological scans show us that the area is rich in Energy Crystal seams and Ore, however they have also revealed that a river of molten lava is approaching our base. You will need to act quickly to breach the flow of lava and continue our mining operation by crossing the lake to mine the Energy Crystals and the Ore. Once we have collected 35 Energy Crystals we can evacuate the base to a safer cavern!

LEADS TO LEVEL 20, 21 OR 22

- **[Level20] \*\*\* Run The Gauntlet \*\*\***

Objective: Listen carefully Rock Raider. A member of the team has been left behind in a labyrinth of underground caverns. He needs your help. Guide him safely to the caverns containing abandoned vehicles and use them to assist him in finding the Rock Raider HQ. Take care down there Rock Raider.

- **[Level21] \*\*\* Air Raiders! \*\*\***

Objective: Right Rock Raider - things are really hotting up now! Rock Raider HQ has been devastated by earthquakes, landslides and cave-ins and our fresh air supply has been used up! We must rebuild the base and get the Support Station functioning. Once we have the base up and running again we must reinforce the area and resume the mining operation. Collect 40 Energy Crystals. WARNING: The scanners have detected a previously unseen creature in the vicinity!

- **[Level22] \*\*\* Lake Of Fire \*\*\***

Objective: Are you feeling cool Rock Raider? You won't be for long. This next mission could be your toughest yet! We have located an area with high amounts of Energy Crystals and Ore. However there are only very small areas of land in a lake of lava. We will give you all the support we can, but you'll have to manage your Rock Raider HQ by sharing resources across the lake of fire! Collect 40 Energy Crystals

LEADS TO LEVEL 23 OR 24

- **[Level23] \*\*\* Back To Basics \*\*\***

Objective: Ok Rock Raider, are you ready for the next mission? Listen carefully as this is a tough mission. We have located a cavern close to the centre of this planet and we need to establish our Rock Raider HQ there before the final push! The problem is that there is a very limited supply of Energy Crystals and Ore in the area so only build what you really need. Be careful not to use too many resources, remember every Energy Crystal counts and you'll need every last one if you are to achieve our total of 45 crystals.

- **[Level24] \*\*\* Hot Stuff \*\*\***

Objective: Ok Rock Raider, this mission is very dangerous so listen carefully! We have discovered an area rich in Energy Crystals and Ore. We need you to establish the Rock Raider HQ and begin mining – we need to collect 45. WARNING: However the location is dangerously close to the base of a volcano and great care must be taken to avoid breaching any lava flows in and around the cavern. Our scanners also report that Rock Monster activity in this area is high so be on red alert! Good luck Rock Raider.

**LEADS TO LEVEL 25 BOSS #3**

- **[Level25] \*\*\* Rocky Horror \*\*\***

Objective: This is it Rock Raider. This is what it's all been building up to! We know that there is an abundance of Energy Crystals deep in the caverns around our Rock Raider HQ. The scanners show that there are Rock Monsters all over the place. This mission will be your toughest yet, but it must succeed if we are to escape from the planet and return home. Establish the Rock Raider HQ as a formidable outpost and build the most powerful mining machinery you can - you'll need it all if you are to collect the 50 Energy Crystals that we still need. Take care down there Rock Raider!
